VINOD KUMAR

Technical Writer

Summary

Technical Writer and DevOps documentation specialist with experience delivering clear, user-focused documentation for SaaS platforms, REST APIs, and system integrations. I am skilled in creating API & SDK docs, developer onboarding guides, integration workflows, SOPs.

Experienced in documenting CI/CD pipelines, cloud infrastructure (Azure), containerization, and AI/ML workflows with a focus on security, compliance, and automation. Proficient with tools like Bitbucket, VS Code, MkDocs, Snagit, and Microsoft ecosystem (Word, PowerPoint, SharePoint, Teams, Azure DevOps), with strong expertise in Git-based version control and documentation best practices.

Technical Proficiency: Docs-as-code, VScode, Bitbucket, Markdown, CI/CD, Containerization, Jira, Confluence, RESTful APIs

Soft Skills: Cross-functional Collaboration, Remote Communication, Agile Workflows

Education

B.Sc. (Bachelor of Science) in Physics, Mathematics and Electronics
(July 2010 - August 2013)
Gulbarga University

Experience

Technical Writer – nGenue
Role: Technical Writer II (Full time)
(Nov 2025 - Current)

- Created and maintained documentation for an end-to-end SaaS platform supporting natural gas billing, scheduling, trading, and customer data management.
- Developed concise **REST API documentation** enabling seamless integration between external trading platforms, nGenue, and CRM systems for automated trade and customer data flow.
- Documented end-to-end workflows for real-time trade data ingestion and system integrations across third-party platforms.
- Collaborated with cross-functional teams to translate complex technical concepts into clear, user-friendly documentation.

Tools & Practices

- Bitbucket for version control and collaborative documentation workflows.
- Created and managed documentation using VS Code and MkDocs (SSG) for structured, scalable content delivery.
- Captured and annotated visuals using Snagit to enhance clarity in user guides and API documentation.
- Followed Google Developer Documentation Style Guide to ensure consistency, clarity, and usability across all content.

Centific Technologies Ltd, Hyderabad (India)
Role: Technical Writer (Full time)
(Feb 2022 – Nov 2025)

- Developed and maintained SDK, API, and DevOps documentation for engineering and QA teams.
- Implemented a Docs-as-Code approach using Markdown, Git, and CI/CD pipelines for automated publishing.
- Created standardized templates (YAML/Markdown) for build, release, and deployment processes.
- Documented CI/CD workflows, containerization, and cloud infrastructure across Azure and AWS.
- Authored SOPs, Installation guides, troubleshooting guides, and release/deployment communications.
- Migrated 500+ wiki pages to a centralized documentation platform, improving usability and access.
- Improved documentation structure and discoverability, reducing support tickets by 60%.
- Collaborated with cross-functional teams to translate complex technical concepts into clear content.
- Trained contributors on documentation workflows and supported Agile/Scrum practices.

Certifications

- ✓ Certified from TechTotal
- ✓ Institute of Technical Writing and Instructional Design

Skill set

Hard Skills	**Soft Skills**
Tech savvy	Communication
API documentation	Problem-solving
Version control	Flexibility
Azure DevOps	Time management
Markdown and mermaids/puml	Multi-tasking
Automation scripts	Cross-functional collaboration
Mkdocs, Bitbucket	
Jira and Confluence pages	Information architecture

Nexteer Automotive, Bengaluru (India)
Role: Technical Writer (Contract)
(July 2020 - Feb 2022)
Payroll company: ER Consulting, Bengaluru

- Gathered and analyzed client requirements, translating them into clear documentation for product engineering teams.
- Authored key technical documents including SRS, system design documents, technical specifications, and safety data sheets.
- Used IBM Jazz and Rational Change to manage version control and improve project traceability.
- Improved content consistency and reuse across products, reducing redundancy and maintenance effort.
- Collaborated with engineering and product teams to identify gaps and ensure accurate, complete documentation.
- Simplified complex technical concepts into user-friendly content for diverse audiences.
- Utilized tools such as IBM DOORS/NextGen, ABBYY FineReader, Vector (AUTOSAR), and ServiceNow to streamline documentation workflows.
- Mentored junior writers and supported team knowledge sharing.

Spectro Cloud, Bengaluru (India)
Role: Document Writer (Contract)
(Dec 2019 – May 2020)
Payroll Company: SRS Business Solutions, Hyderabad

- Produce end-user guides, reference material, how-to guides, diagrams, and structured tutorials focused on their Kubernetes management platform
- Support developer and operations-oriented documentation, including API references, interactive examples, and automation walkthroughs
- Work closely with engineers and SMEs, using tools and features in real environments to test and understand features firsthand before documenting them.
- Authoring in Markdown and contributing to their documentation with the help of GitHub Actions

First American India, Bengaluru (India)

Role: Documentation Specialist (Contract)
(August 2016 – August 2018)
Payroll Company: Trigent Software, Bengaluru

- Crafted user manuals, Help articles, training materials
- Edited and peer-reviewed documentation for First American Title, ensuring high-quality deliverables with minimal need for supervision.
- Partner with technical staff
- Managed documentation delivery timelines, adhering to established guidelines.
- Migrated 300+ legacy documents to NextGen
- Identified content gaps and implemented improvements
