VINOD KUMAR

SENIOR TECHNICAL WRITER | DOCS-AS-CODE | DEVELOPER AND PRODUCT DOCUMENTATION

Hyderabad, India | +91 80502 59010 | vinod.basutkar04@gmail.com

LinkedIn: https://www.linkedin.com/in/vinod-kumar-075753167/ | **Portfolio:** https://vinuu1990.github.io/vinod-portfolio/

PROFESSIONAL SUMMARY

Senior Technical Writer with 7+ years of experience creating and managing product, developer, API, SDK, and DevOps documentation for SaaS platforms, engineering teams, and cloud-based solutions. Experienced in establishing and maintaining Docs-as-Code frameworks using MkDocs and Docusaurus, authoring Markdown content, and managing documentation repositories and publishing workflows with Git, GitHub, Bitbucket, and CI/CD. Skilled in documentation standards and governance, SME collaboration, information architecture, technical editing, architecture diagrams, and AI-assisted documentation using ChatGPT and Claude. Able to build static documentation sites locally and manage publishing to GitHub while coordinating reviews, maintenance, and documentation releases with cross-functional teams.

TECHNICAL SKILLS

Technical Writing: Product and developer documentation, API and SDK documentation, user guides, in-product help, onboarding guides, FAQs, troubleshooting, release notes, changelogs, upgrade and migration guides, installation and configuration guides, CLI documentation, SOPs, runbooks, infrastructure and deployment documentation.

Docs-as-Code and Publishing: MkDocs, Docusaurus, Markdown, static site generation, local documentation builds, Git, GitHub, GitLab, Bitbucket, Azure Repos, branching strategies, pull requests, peer reviews, CI/CD publishing workflows, GitHub Actions, Jenkins, documentation versioning and maintenance.

Documentation Governance: Documentation standards, templates, terminology, style guides, information architecture, content ownership, review schedules, approval workflows, technical editing, content-gap analysis and release coordination.

AI-Assisted Documentation: ChatGPT, Claude, AI-assisted research, drafting, editing, summarization, content-gap analysis, generated-content verification, AI writing and review skills, domain accuracy, application accuracy, completeness, conciseness, AI plugin research and requirements.

Diagrams and Technical Formats: Mermaid, Mermaid.js, PlantUML (PUML), UML, architecture diagrams, workflow and sequence diagrams, YAML, JSON, REST APIs, SDKs, environment variables and command-line examples.

Work Management and Collaboration: Jira, two-week Agile/Scrum sprints, Confluence, acceptance criteria, SME interviews, requirements gathering, cross-functional collaboration, internal training materials and knowledge sharing.

Tools: VS Code, Snagit, Azure DevOps, Microsoft Word, PowerPoint, SharePoint and Microsoft Teams.

PROFESSIONAL EXPERIENCE

nGenue | Nov 2025 – Present

Technical Writer II | Hyderabad, India

- Established and maintained Docs-as-Code frameworks using MkDocs and Docusaurus, supporting structured documentation development and publishing.
- Developed and maintained documentation platforms using MkDocs and Markdown, and developed Docusaurus for internal documentation.
- Created and maintained Markdown-based content, following structured authoring practices and documentation standards.
- Built and generated static documentation sites locally and managed publishing workflows to GitHub.
- Managed documentation repositories using Git, Bitbucket, GitHub, and GitLab, including branching strategies, pull requests, version control, and peer-review workflows.
- Established documentation standards, templates, terminology, and style guides to maintain consistency across technical content.
- Managed documentation ownership, review schedules, approval workflows, version control, and ongoing content maintenance.
- Created installation guides, configuration guides, user guides, and release notes.
- Developed troubleshooting guides, user-scenario articles, and FAQ documentation.
- Conducted SME interviews and gathered technical information from product owners, engineers, business analysts, QA, and support teams.
- Applied information architecture, technical editing, and content-gap analysis to organize and improve documentation.
- Created architecture diagrams, process flows, and sequence diagrams using PlantUML (PUML), UML, and Mermaid.
- Used generative AI tools, including ChatGPT and Claude, for research, drafting, editing, summarization, content-gap analysis, and verification of AI-generated content.
- Collaborated with AI teams to research documentation-focused plugins and improve AI-assisted technical writing workflows.
- Managed documentation tasks through Jira two-week Agile sprints, defined acceptance criteria for workflows, coordinated documentation reviews and releases alongside product and operational changes, and created internal training materials and Confluence pages for knowledge sharing.

Centific Technologies Ltd | Feb 2022 – Nov 2025

Technical Writer | Microsoft Azure OneBranch Project | Hyderabad, India

- Developed and maintained SDK, API, and DevOps documentation for engineering and QA teams.
- Implemented a Docs-as-Code approach using Markdown, Git, and CI/CD pipelines to support structured documentation and automated publishing.
- Created standardized YAML and Markdown templates for build, release, and deployment processes.
- Created onboarding guides, troubleshooting guides, FAQs, architecture documentation, and Mermaid and PlantUML diagrams.
- Wrote deployment instructions and infrastructure runbooks to help technical teams perform operational tasks consistently.

- Created configuration and command-line documentation covering configuration parameters, environment variables, YAML and JSON files, CLI commands, installation, authentication, and deployment.
- Maintained release notes, changelogs, upgrade guides, migration instructions, deprecation notices, backward-compatibility information, and end-of-life announcements.
- Migrated more than 500 wiki pages to a centralized documentation platform, improving content access and discoverability.
- Collaborated with cross-functional teams to clarify requirements, validate technical details, identify content gaps, and produce accurate documentation.
- Improved documentation structure and discoverability, contributing to a reported 60% reduction in support tickets.
- Trained contributors on documentation workflows and supported Agile/Scrum practices.
- Supported Microsoft Azure OneBranch developer documentation by documenting engineering workflows, CI/CD pipeline guardrails, onboarding prerequisites, and engineering standards.
- Contributed to the migration of legacy Azure DevOps Wiki content to a centralized Engineering Hub by auditing content and improving information architecture.
- Documented Git branching approaches, including Trunk-Based Development and GitFlow, branch policies, and engineering contribution paths.
- Managed documentation updates through Azure Repos, pull requests, code reviews, and automated Markdown validation; created maintainable architecture and sequence diagrams using PlantUML and Mermaid.js.

Core tools and frameworks: Azure DevOps (ADO), Azure Repos, Git, Markdown, PlantUML, Mermaid, wiki migrations, SDKs, CI/CD, and Docs-as-Code.

Nexteer Automotive | Jul 2020 – Feb 2022

Technical Writer (Contract) | Bengaluru, India

Payroll company: ER Consulting, Bengaluru

- Gathered and analyzed client requirements and translated them into clear documentation for product engineering teams.
- Authored software requirements specifications, system design documents, technical specifications, and safety data sheets.
- Used IBM Jazz and Rational Change to manage version control and improve project traceability.
- Improved content consistency and reuse across products, reducing redundancy and maintenance effort.
- Collaborated with engineering and product teams to identify gaps and ensure accurate, complete documentation.
- Used IBM DOORS/NextGen, ABBYY FineReader, Vector (AUTOSAR), and ServiceNow to support documentation workflows.

Spectro Cloud | Dec 2019 – May 2020

Document Writer (Contract) | Bengaluru, India

Payroll company: SRS Business Solutions, Hyderabad

- Created end-user guides, reference material, how-to guides, diagrams, and structured tutorials for a Kubernetes management platform.
- Supported developer and operations documentation, including API references, interactive examples, and automation walkthroughs.
- Worked with engineers and subject-matter experts to test features in real environments before documenting them.
- Authored Markdown content and contributed to documentation publishing workflows using GitHub Actions.

First American India | Aug 2016 – Aug 2018

Documentation Specialist (Contract) | Bengaluru, India

Payroll company: Trigent Software, Bengaluru

- Created user manuals, help articles, and training materials for First American Title.
- Edited and peer-reviewed documentation to improve quality, consistency, and usability.
- Managed documentation delivery timelines and collaborated with technical staff to clarify content.
- Migrated more than 300 legacy documents to NextGen and identified opportunities to improve content.

EDUCATION

Bachelor of Science (B.Sc.) in Physics, Mathematics and Electronics
Gulbarga University | July 2010 – August 2013

CERTIFICATIONS

- Certified by TechTotal.
- Institute of Technical Writing and Instructional Design.
